Dear Mr Harris

Re: United States of America Patent Application No. 10/672,306
entitled A METHOD FOR PRODUCING A FERROELECTRIC CAPACITOR AND A
FERROELECTRIC CAPACITOR DEVICE
in the name Infineon Technologies AG

Thank you for your letter of 6 May 2006 reporting the outstanding Office Action.

With reference to the title of the specification, we agree to the proposed title suggested by the Examiner being:

"Method for producing a ferroelectric capacitor that includes etching with hard masks".

With reference to the typographical error on page 7 line 22, please amend the text from "...bottom electrode 4..." to "...bottom electrode 2...".

With reference to claim 6, please amend the text at line 3 to read:

"...said interlayer dielectric layer..."

We look forward to receiving confirmation of filing of the response in due course.

Further, as this case is heading for allowance relatively unscathed, it is likely the client may wish to file a Divisional application for the remaining non-elected claims. We therefore ask that you ~~do not~~ pay the issue fee early until we have received instructions from the applicant as to whether they wish a Divisional application to be filed.

Yours sincerely
